 Zerotss

About

Full Stack Developer focused on enterprise-level Java applications, with hands-on experience in Android development. Strong interest in building robust and maintainable solutions. Solid foundation in React and TypeScript, enabling effective collaboration across the stack.

Experience

Junior Full Stack Developer *Valladolid, Spain*
Hiberus *Feb 2025 – present*

I have been involved in the development of enterprise-level applications, mainly focused on Java-based solutions, including some frontend work with Angular.
- I improved my productivity by creating a custom code generator to automate repetitive tasks.
- Collaborated directly with clients, understanding their needs and proposing clear and effective technical solutions.

Industrial Cleaner *Valladolid, Spain*
Senior (Renault Group) *Sept 2024 – Jan 2025*
- Combined work as an Industrial Cleaner with training at Hiberus, focusing on Java, Spring Boot, Angular, TypeScript, and general software development.

Mobile Developer Intern *Valladolid, Spain*
Serbatic *Mar 2024 – May 2024*

Learned Android development with Jetpack Compose and contributed to an internal app following Clean Architecture principles.
- Completed Android Basics with Jetpack Compose course, learning core Android components and Kotlin.
- Contributed to the development of an internal mobile application as part of a team.

Education

Centro Gregorio Fernández *Valladolid, Spain*
Higher Technician in Multiplatform Application Development *Sept 2023 – present*
During my studies, I acquired a solid foundation in programming, databases, version control, and software development best practices. This period represents the core of my technical education and the basis of my professional growth as a developer.
